March 5, 2016This a wonderful coffee maker! This is the easiest to set time, and program the time you want to start brewing. A small green light will let you know when the automatic program is on. All you have to do is add the right amount of water, a filter, and your favorite coffee. This device uses #4 cone. Some may see a flaw in this. I see that as a plus. I've tried coffee makers that use basket filters (which cost less than a cone). Sometimes the sides of the filter basket will tip over while brewing. This usually led to the fact that the territory and water overflowed coffee pot and hot plate. I don't have this happen to a filter cone. I like the automatic pause function. This allows you to pour a cup of coffee until the brewing cycle is over. This bank will be automatically disabled within two hours, which is another feature I really like. If you're not going to use all the coffee you brew for 30 minutes or so, then it's best to pour the finished coffee into the heat pot. I also recommend you let the pot cool before washing, and wash it with a sponge or cloth-anything that can clog the insides and make it crack later. Helpful? February 28, 2016This Hamilton Beach programmable coffee pot has all the same features as coffee makers 2 or 3 times more expensive. The buttons are easy to find and be able to install a coffee pot to be ready for you when you wake up is a huge plus. The tank is very accessible with one finger, so you can hold the pan with water in the other hand. There is a swing hand you slide to the side to place the coffee in the basket. My only comment is this machine doesn't come with a sample package of filter papers #4 so you'll have to go buy some of them before you can use it. It would be very useful if some of them were enclosed in a field for the consumer. I happen to have a bunch of them on hand, so I was able to use it right away. This makes a very good coffee no matter what coffee you use. The carafe is made of glass, so you have to be careful not to hit it, but it does keep the coffee hot for a long time and it doesn't taste burnt, as is sometimes the case in a metal carafe. I highly recommend this Hamilton Beach coffee pot maker for all coffee drinkers? March 9, 2016 We love the way coffee comes out of our Hamilton Beach 12 cup programmable coffee maker. We had to adjust the amount of coffee grounds we added. And a packet of coffee and pot directions said put in quite a lot, but we adjusted that to our taste and that's fine. We bought a Coffee-Medium Blend breakfast roast at Walmart and found it to be delicious. Directions are very easy to understand. We programmed the machine to turn on at a certain time in the morning, so the coffee is ready when we. We only make a small amount of coffee every day, like there are only 2 of us, but it does a wonderful job of doing it. I fill it on a 4 cup mark and this makes 2 good sized mugs. I bought a bought coffee filters that they recommended. The only improvement I see for this coffee maker is getting the water for the coffee to come out a little hotter as we have to put our mug in the microwave for a few seconds, probably due to the amount of cream that we put in. Helpful? On March 12, 2016, I received this product from the Spark Reviewer program. Our other coffee maker will receive hours of time during the week and will require adjustments several times during the week. This coffee maker requires #4 cone that were available at our local store. It is a tall and slender style coffee maker. The carafe has a large handle that my hand fits in easily when pouring coffee. The reservoir has clearly marked lines that are easily visible. The watch and controls are at the manufacturer's base, the watch at an angle makes it easy to read. I would like to light it up. Programming is very easy and straight forward. Five buttons and two indicators on the face of the plate. The coffee wasn't bitter, just a smooth tasting for any of the roasts that we tried. The only complaint that we have on a coffee maker is that the carafe can be a little difficult to get in and out of the manufacturer. This can change over time with age and use. It's not a deal breaker for us, but it can be aggravating for someone else. Now I can enjoy coffee in the morning without having to get up early and do it. All in all a good coffee maker without a lot of bells and whistles. Helpful? February 28, 2016Y am an enthusiast of coffee pot; I have to have 3 or 4 coffee pots in my house now. My thing with the coffee shop, I'm very critical; and the reason is that I had coffee pots that leak; A couple of clocks, a timer resets itself, etc. so we have Hamilton Beach - I love Hamilton Beach and have had their coffee pot in the past. I currently use Mr. Coffee, which I like. Pros: He makes 12 cups of coffee, it has a wide area to pour water, coffee and manufacturer compact, it's very easy to set the clock and program timer, it shuts down after 2 hours, and keeps the coffee hot, it has the number of cups on either side of the pot, the coffee filter fits tightly in the kettle, . Cons: When opening the top to add water, you will notice the top seems very loose as it can move away at any moment, the watch does not light up. Yes, I would recommend this coffee maker, it works great, I have used it already three times and I literally can not find anything that would dissuade me at this moment and time. Definitely would recommend this coffee maker to anyone. Helpful? March 5, 2016Y received this Hamilton Beach Black 12 Cup Programmable Coffee Maker through the Walmart Spark Reviewer program for free to perform a product review. Black plastic exterior addition to any kitchen and looks sharp on the counter. It has a digital watch for convenience. I like that clock downstairs, so the steam doesn't hurt it. It's programmable, so you can choose when brewing starts, hours ahead. The automatic pause and serve feature allows you to grab a cup of coffee while it's still brewing. The warming mode keeps your coffee hot and fresh. I like the two-hour automatic turn off because it prevents problems with leaving it for the whole day. The non-stick warmer plate prevents the burning of spills and resists the dirty coffee buildup. The black color does not show coffee stains easily, as whites do, and it easily wipes clean. I love the big, easy-to-see water level indicator that makes it easy to adjust the strength and size of each batch. It has a cone-shaped filter basket for great coffee flavor uses #4 a coffee filter cone. I like that the filters don't seem to fold and get the bases in the pan like some other coffee pots. In the photos I posted I was heating a pot of water for hot tea. The filling area is quite large and easily filled. Helpful? March 2, 2016Ka 2nd March 2, 2016, I received a black Hamilton Beach 12-cup coffee maker. To my surprise, the shipment was pretty prompt, kudos to the delivery department. It is equipped with bilingual guidance. It has a burn warning as a potential threat to households, so I recommend reading the fine print before operating this product. The device does not have a permanent filter like my previous coffee maker, so you will need to purchase cone-shaped filters, depending on the model, prior to purchase. Unfortunately, I couldn't use it right out of the box for that very reason. It is programmable and consumers can suspend the brewing process to pour a cup of coffee before it is fully brewed. It has a transparent water tank to make it easier to manage the water as you fill it. Above the filter basket is a lever used to secure the filter and filter the basket in place, you slide it to the right to release it and left to secure it. This particular model is quirky, charming, and it doesn't take up too much space, which is perfect for small apartments. So far, the only major drawback is the lack of a permanent filter, except that this product meets my expectations? March 23, 2016This Hamilton Beach coffee maker is a good addition to the kitchen. I have read a few reviews about this coffee maker and it seems that having a control panel at the bottom was a problem for some people. I think they say it might stop working if coffee gets there? Ok I have a coffee maker with a control panel on top, and if you think about it, steam goes up into the control panel every time it's used, not to mention more flow, so the control panel is on Coffee makers will always have moisture in it. I've used the Hamilton coffee maker every day for the last 2 weeks, and never once have the control panel got got gotten Hamilton Coffee Maker has only 5 buttons, 1 hour, 1 minute these set the time of day and the time in which to run the manufacturer, 1 button program 1 in/ turn off the button and 1 auto. The instructions are very, very easy to understand and very complete. (Can I point out: another coffee maker I have 8 buttons and zero instructions, almost impossible to use without making a complete mess). Hamilton Beach Programmable Coffee Maker uses a 4-conus filter that is not available in all stores, which is my reason for 4 stars. I only found them in big grocery stores. Helpful? March 14, 2016Besides Hamilton Beach 12-cup Programmable Coffee Maker, I also own a Keurig 2.0 2000 coffee maker. I really love my Keurig, but I'm tired of doing one cup at a time some days, so after getting this Hamilton Beach 12-cup programmable coffee maker, I can make 12 cups. I used to have Mr. Coffee, a coffee maker, but my husband came across him and he fell and after that he never worked straight again. I also didn't like how part of the programmer worked or not. Anyway, when I got this Hamilton Beach Coffee Maker I was ready to try it out, so I cleaned it up as you should and set it all up to brew a pot of coffee the next day, so I set a timer for 12:30 in the afternoon, so when I got home from work I would have a pot of coffee ready to enjoy. It also comes with a 2 hour automatic turn-off built-in. I wish there was a way to turn off the automatic control shutdown, so you don't have to watch out for two hours and have to turn it back on. It's great if you forget to turn it off, it will automatically do it for you. It uses a cone-shaped filter size number 4. When you put it in the machine, you should make sure you push it down on the filter basket so it sits properly in the coffee maker, and make sure you align the tab correctly and gently press down on the basket. Drippdi Carafes? Just like all Hamilton Beach coffee makers are a 12-cup programmable coffee maker, if you pour it quickly it you will fall out of the carafe side, so just pour it slowly and easily, and no problem, otherwise you'll have a mess to clean up. But overall I like this coffee maker and yes, I would recommend it to family and friends. Helpful? I ordered this model of HB b/c it became difficult to find a cone-like automatic drip coffee maker; it was one of the only options there. So disappointed in the coffee he makes. It's a 12 C pot. With a ratio of 1 T coffee: 9 C of water, we end up with the base in each pot. I emailed HB customer service asking this is OK? They asked for more information. I even sent back pictures (bases up and over wet filter, base in cup, base in sink). Their solution was to use coffee. It didn't help. Fu. I haven't read this complaint from others, so I suspect there's something wrong with the coffee pot Got.
